- The "Beocin" cement factory near Novi Sad is responsible for meeting the cement requirements of:
 - The Zagreb-Belgrade "Autobahn";
 - The Samac-Sarajevo railroad;
 - Most of the reconstruction work in Croatia and Serbia.
- Most of the goods produced by the "Jugocaska" textile factory at Kranj is exported to Russia and labeled "Made in Russia".
- Courses are being held at the principal Slovene hydro-electric power stations at Fala, Dravograd and Velenje for training skilled electric technicians. A high-tension cable is being constructed which will link Vinkovici and Borovo.
- The Yugoslav Government has created an organization called Otpad which is responsible for the salvage and subsequent distribution of miscellaneous scrap materials. The following figures indicate the quantities of materials salvaged by Otpad in the Gospic district during the year 1946:

Scrap metal	6,500 Quintals
Broken but repairable machinery	600 "
Waste paper	150 "
Rubber scrap	40 "
Bones	250 "
Rags	900 "

The collection was carried out almost entirely by SKOJ.

- In the course of a geologic survey of the Brezovac mines area near Komet, new chrome ore deposits were discovered. The chrome ore bed extended over approximately nine square kilometers. Kaolin and quartz deposits have also been discovered in the vicinity of Grahovljani.
